SHAZIDUL ISLAM

Computer Science & Engineering · Developer · Designer

ABOUT

Motivated CSE student at United International University with hands-on experience building full-stack web applications, managing academic grading, and leading creative marketing teams. Passionate about clean, purposeful software and collaborative problem-solving. Seeking opportunities to contribute to innovative projects while continuing to grow as an engineer and designer.

WORK EXPERIENCE

Grader · Dept. of CSE · United International University **2023 – Present**

- Evaluated student assignments and provided detailed feedback to support academic growth.
- Collaborated with faculty to maintain consistent grading standards across the department.
- Strengthened analytical, communication, and time-management skills.

Head of Department — Marketing & Branding · Student Organisation · UIU **Dec 2023**

- Promoted to HoD in recognition of leadership, initiative, and creative contributions.
- Led branding strategy and coordinated cross-team marketing campaigns.
- Managed a creative team, overseeing visual identity and communications output.

SELECTED PROJECTS

Smart Canteen — *PHP · MySQL · JavaScript*

A university canteen management system featuring digital ordering, queue optimisation, and payment tracking. Designed to reduce wait times and streamline canteen operations at scale.

Study2Gether — *Next.js · MySQL*

A collaborative e-learning platform bridging students and educators with structured study rooms, resource sharing, and progress tracking tools.

E-Commerce Platform — *PHP · MySQL · JavaScript*

A full-stack e-commerce solution with product management, shopping cart, and checkout flow — built with a clean, responsive front end.

RESEARCH

2+ Peer-Reviewed Research Papers

Undergraduate research within the Department of CSE, United International University.
